RIMMA2020
6th International Conference on Risk Information Management, Models and Applications
Berlin (Germany), May 26/27, 2020 http://RIMMA2020.org
Hotel SI Steglitz International

2nd Call for Submissions and Exhibition

Updates: Submission date extended until January 26, 2020
  additional cooperation partner organizations:
  * German Committee for Disaster Reduction DKKV
  * Disaster Competence Network Austria DCNA
roundtable discussion on “Governance of RISK Information”

RIMMA2020 is the event to discuss current best practice, demands, innovations and applications in Risk Information Management, especially in all phases of the natural/technical disaster management cycle.

This international interdisciplinary Conference on Risk Information Management, Risk Models, and Applications will enable sharing of best operational practices as well as giving space for discussing methodological as well as technical problems in safety and security modeling from the information systems and management point of view.

While considering not only data collection and storage, RIMMA2020 discussions comprise the full information management cycle, especially aiming at turning data into decisions, workflows and actions, and finally providing management with appropriate retrospective event evaluation based on complex documentation.

The following areas will be of special interest for the conference:

- risk information management, risk information models
- risk databases, risk information cross-organizational interoperability, standards development, testbeds
• cross-domain / cross-program coherence and accountability
• risk information processes modelling and applications,
• services and service composition
• common operational picture, digital situational awareness,
• cross-organizational management, command and control
• logistics in support of situations, scenario development and decision support
• risk & security information system structure, components
• cross-disciplinary risk-related information systems with regard to other UN Instruments requirements (conventions, programs, declarations, etc.)
• risk and multi-risk cartographic issues
• risk and risk-model change in time and space, thresholds definition and consequences
• risk & security modeling issues for infrastructure (e.g. factories, railways, highways, pipelines, maritime traffic etc.)
• disaster management and emergency preparedness, prevention, alert, response and mitigation
• data processing related to risk management issues with special regard to information system structural aspects and Risk Model Methodology and implementation
• documentation, archiving, and open access to risk, disaster and security information
• CBRN-E risks issues for critical infrastructures, citizens, and the environment risks issues for humans, and the environment
• risk communication (decisionmaking, actors, public awareness etc.)
• urban / smart city resilience, risk, safety and security information and mapping
• user-/actor-group specific risk and security management issues

According to the CODATA principles of the broadest interdisciplinary discourse in the domain of Data for Science and Technology, submissions are expected from different fields of the sci/tech communities, developers and practitioners to exchange best practices and initiate recommendations for future research and development.

RIMMA2020 is organized by CODATA-Germany, The German National Committee to the International Science Council ISC Committee on Data for Science and Technology

Conference Details:  http://RIMMA2020.org

We invite you to
- Submit your contributions (presentations, papers, posters) via the EasyChair conference tool
- Consider presenting your products, services, projects and expertise in the exhibition
- Make proposals for special topic sessions, panel discussions and breakout meetings
